We appointed our application of the Open Edx Lagunita platform, after the name of a bed of Lake Amata on the Stanford campus, a favorite meeting place of the students. Stanford Online used the open Edx technology to offer more of 200 free and open online courses on the lagoon platform for more than 10 million students in 190 countries. Most courses on lagoon offered the ability to obtain a declaration of compliance, based on the overall degree of the course. An admission declaration recognized that an online stanford course offered through lagoon was completed with a degree of transition from a detail This admission statement serves as a verification of successful completion of the course. Information for students who were activelyWith the platform, as anyone who had been released a declaration of compliance, were notified during the beginning of 2020 that the lagoon platform was closing. These students were invited to download any contents of the course and declaration of compliance by March 31, 2020. The answers to many frequent questions for students before the lagoon pension were available on our FAQ page. The Stanford Center for Professional Development works with Stanford's faculty to extend their teaching and their research to a global audience through online and in-person learning opportunities. While the lagoon platform has been withdrawn, we offer many other platforms for extended education. The faculty can find answers to many frequently asked questions here.
